June 26, 2009

To all users of the Shulus/Springs Domestic Water System.

RE: Boil Water Advisory as of April 27, 2009

The Public & Capital Works would like to thank everyone for their patience and understanding. Health Canada has issued a drinking water consumption advisory, as a precautionary measure.

You are advised to use boiled water or alternate water source such as bottled water for the following:

- Drinking
- Preparing infant formulas, juice, ice cubes, tea, coffee
- Washing fruits & vegetables
- Cooking
- Dental hygiene (brushing teeth)

For boiled water, please ensure that the water is brought to a "rolling boil" for a minimum of 2 minutes prior to consumption.

Update:

The department has placed a reminder of the above advisory in the June Newsletter. We are still monitoring the system very closely. We have been manually disinfecting the system as well. By this we mean that we place a small amount of bleach into each reservoir.

We will be swabbing the system from the Pump house on the Mameet Lake road to the end of all lines. We will be sending a notice house to house to let you know when we will be starting this. This will be done as soon as the water line repairs are completed on the Shulus/Springs Domestic Water System.

The completion of the repairs and connection of the water main to the rest of the system will take place within the next two weeks. Once connected we will be cleaning the second reservoir and then all the water mains.
