

Microblading

By Bonnie Bent

What is Microblading?

-Microblading is the most innovative and natural looking semi-permanent tattoo to define your brows and face. Microblading is the less invasive form of permanent makeup. Pigment is professionally tattooed in the upper dermal layer of the skin. Using 7 micro needles that scratch the surface of your brows. While traditional tattooing goes 7 layers deep, microblading only goes 1.5 layers. Microblading is a technique we use for creating the most natural brows possible. The hair stroke technique mimics the eyebrow hairs and creates a feathering effect. This innovative technique is far more natural looking than a solid or powder brow fill.

Microblading is perfect for the following:

- Hair loss and lack of definition
- Thin brows caused by years of over tweezing
- Chemotherapy or Alopecia
- Scars
- Lengthening shorter existing eyebrows
- Correcting asymmetry
- Active lifestyles
- Trouble applying conventional makeup

The procedure including numbing, color choice, shape and microblading takes over all 2 hours. All my pigments are 100% natural ingredients with absolutely no harmful metal additives. All supplies are factory sealed and or medical-grade disinfected. The microblading last 18-24 months providing you receive a touch up 6 weeks after the initial procedure. I am certified thru Graceful Lashes out of Barrie Ontario. My services are completely mobile. So I come to the comfort of your own home. While the price of microblading ranges anywhere from \$350-\$700 I am offering my services at an affordable price of \$200 for a set of eyebrows with a \$50 touch up. Please feel free to contact me to set up an appointment or for any inquiries.
